HORSE RACING AND CASINOS

The New Jersey Racing Commission regulates the various harness and thouroughbred tracks throughout the state. Among these are the Meadowlands Track, Atlantic City Raceway, and Freehold Raceway.

The Casino Control Commission regulates the activities of Atlantic City Casinos and reports their activities and revenues. The Commission also collects statistical information on the casinos and sets up revenue funds to assist the elderly.

HOUSING

The statistics presented in this report are based on data derived from monthly reports submitted by local building inspectors in all New Jersey municipalities that issue building permits for residential construction. The Division of Planning and Research cooperates with the United States Bureau of the Census in this program, the state agency surveying 20% and the Federal 80% of the state's municipalities.

New York's leading oceanborne general cargo import commodities showed a mixed pattern in 1979. Selected raw materials and food products registered gains while manufactured products and consumer goods moved lower.

Non-metallic minerals and slag, the Port's leading general cargo import commodity, surged upward 49.4% to 1,189,771 tons. Sugar rebounded 40.5% to 718,336 tons from the unusually depressed levels of 1978. Coffee continued its resurgence, up 19.3% to 482,159 tons.

Two major commodities, alcoholic beverages and bananas, edged downward slightly following several years of above-average gains.

NOTE: These cost estimates are based on data supplied by local building inspectors. They do not include the cost of land, sewerage, or other improvements, nor the other differences between costs of construction and selling prices. The data do not standardize for qualitative changes in the mix of housing authorized and, therefore, should not be interpreted as indicators of the impact of inflation on building costs.

The Port of New York-New Jersey's petroleum imports fell 10.6% to 38.2 million tons in 1979. Both crude oil and refined petroleum products sustained declines: crude oil imports declined 2.6% to 18.9 million tons, residual fuel oil imports fell 21.2% to 15.9 million tons, and distillate fuel oil imports dropped 13.9% to 1.2 million tons. In contrast, kerosene and jet fuel imports surged upward 105% to 849,921 tons.

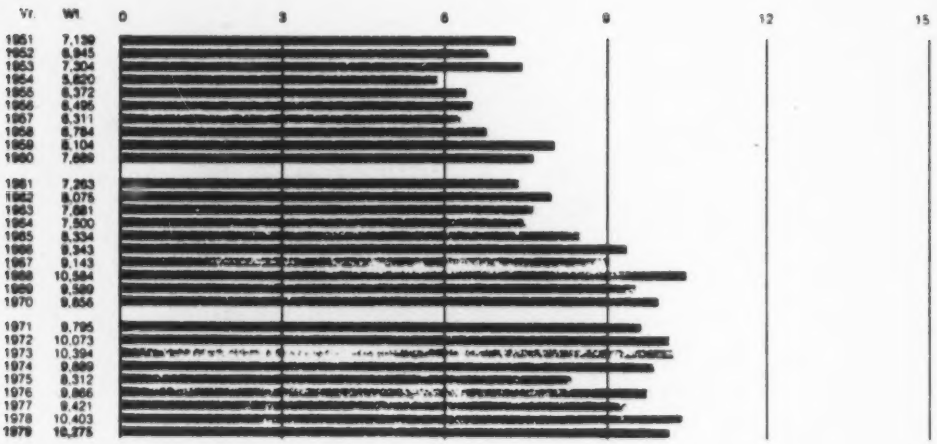
The Bahamas was the bi-State Port's leading source of general cargo imports in 1979. Two low value commodities, non-metallic minerals and slag and salt, accounted for virtually all of the tonnage.

Japan fell to second place in 1979 as imports from that nation dropped 20%. Reduced inbound movements of chemicals, steel products, and color television sets accounted for much of the decline.

Brazil registered the largest relative gain among New York's 20 leading sources of general cargo in 1979. Volume spurted 74.3% to 518,497 tons, reflecting a steep gain in sugar imports.

The Port's Oceanborne General Cargo Imports

Table: thousands of long tons/Graph: millions of long tons



New York's foreign oceanborne general cargo imports edged downward slightly in 1979. Volume was 10,275,097 tons, down 1.2% from 1978. The easing of New York's general cargo imports was in line with national trends. Inbound cargo had risen significantly during the economic expansion which began in 1975, but appeared to top out in 1979 as the national economic expansion reached a more mature phase.

The fourth quarter of 1979, however, showed the highest level of general cargo imports at the bi-State Port since the war year of 1941. Sharply higher imports of non-metallic minerals and slag and sugar accounted for much of the gain.

The quarterly pattern was as follows:

	1979 (long tons)	1978 (long tons)	% Change
1Q	2,249,004	2,735,720	– 17.8

The Port's Oceanborne General Cargo Exports

Table: thousands of long tons/Graph: millions of long tons

The Port of New York-New Jersey's foreign oceanborne general cargo exports rose 13.1% to 6,001,880 tons in 1979, reaching the highest levels of outbound traffic since 1974. The buoyant economies of, and increasing demands by, key European and Far Eastern trading partners, coupled with the continued impact of the dollar's decline, spurred the volume increase.

New York's outbound tonnage in the fourth quarter of the year was not only the year's highest, but also the highest level of general cargo exports since the first quarter of 1975. The second highest volumes were achieved in the first quarter, although the large percentage gain over the corresponding quarter in the previous year represents a comparison with exceptionally low export volumes in early 1978. Significantly, the tugboat strike which lasted most of the second quarter of the year, curtailed cargo gains and depressed volume figures for that quarter.

The quarterly pattern was as follows:

	1979 (long tons)	1978 (long tons)	% Change
1Q	1,547,931	1,120,093	+38.2

Japan maintained its position in 1979 as the bi-State Port's leading market for general cargo. It accounted for 817,293 tons or 13.6% tons of New York's total outbound general cargo.

Shipments to Argentina surged upward 182.5% to 81,976 tons, reflecting the resurgence of the Argentine economy and the effects of trade liberalization measures. The Port's exports to Argentina showed across-the-board strength, with sizeable gains in machinery and capital goods commodities, semi-processed goods, raw materials, and consumer goods.

Other major markets posting sizeable gains included Spain, up 110.8%, Taiwan, up 50.9%, Italy, up 40.7%, and West Germany, up 39.8%. Spain and Italy benefited from higher shipments of iron and steel scrap while West Germany and Taiwan enjoyed higher levels of capital goods exports (i.e. machinery and high technology commodities).

New York's top 20 general cargo export commodities registered 14 gains and six losses in 1979. Iron and steel scrap, the top ranking commodity which is used as a raw material in the steel making process, rose 16.1% to 1,800,738 tons. Over two-thirds of this tonnage was destined for Japan, Spain, and Italy.

Plastic materials, one of New York's fastest growing export commodities, surged up 66.4% to 319,671 tons. Shipments to Korea, Hong Kong, and the Netherlands were especially strong.

Other significant gains were posted by a wide range of commodities, including raw materials, machinery and capital goods, and consumer products. Up over 10% were waste paper, organic products, steel plates and sheets, non-ferrous scrap and slag, photo supplies, paper and paperboard manufactures, and agricultural machinery.

First place rankings are an indicator of comparative port activity which measure the breadth of a port's commodity mix by determining which port led the nation in each of the 211 export and 206 import commodities defined by the Bureau of the Census.

In 1979, the Port of New York-New Jersey was the leading U.S. port in the export of 66, or 31.3% of the nation's 211 general cargo export commodities. This was three times the number of first place rankings of the runner-up, New Orleans.

The bi-State Port was also dominant in the inbound side, ranking first in 84 commodities, or a 40.8% share. Los Angeles, with 31 first place rankings, was second.

Clothing maintained its position as New York's leading air cargo import commodity in 1979 despite a 16.5% drop to 47,235 tons. Footwear, the second ranking air cargo import commodity, eased 7.6% to 28,330 tons. Together, the two commodities accounted for over 25% of New York's total air cargo imports.

Although both electric motors and generators and internal combustion engines posted gains near 50%, machinery and high technology commodities were generally lower.

The United Kingdom strengthened its position as New York's leading market for air cargo in 1979. Volume rose 5.6% to 49,651 tons as shipments of machinery and textiles exhibited strength.

New York's top ten markets for air cargo in 1979 were unchanged from 1978. They included seven western European nations, Japan, Saudi Arabia and Brazil.

West Germany maintained its position as New York's leading source of air cargo imports in 1979 despite a 6.8% decline to 37,474 tons. Lower inbound movements of machinery and capital goods accounted for much of the decline

Imports from Italy, the second ranking source of air cargo imports, edged downward 2.7% to 36,918 tons. The textile/apparel group dominates New York's inbound air cargo trade with Italy.

Office machinery, New York's leading outbound air cargo commodity, surged upwards 19.1% to 42,056 tons in 1979. The leading markets for New York's office machinery were West Germany, the United Kingdom and France.

Although high value machinery and technological commodities continued to dominate New York's air cargo exports, two food products — fresh or frozen meat and fish and fish products — posted the largest relative gains among commodities in the top 20. Outbound movements of fish & fish products climbed 57.9% while fresh or frozen meat rose 43.5%.

New York's air cargo exports reached an all-time record in 1979. Volume was 379,404 tons, up 3% from 1978. In the past eight years, New York's outbound foreign cargo has more than doubled.

New York's 3% tonnage gain in 1979 represents a slowdown in growth from the 15% plus gains in 1977 and 1978. U.S. foreign air cargo trade appeared to be entering a period of consolidation as the national economic expansion which began in 1975 moved into a more mature phase.

New York's foreign air cargo imports fell 5.4% to 292,154 tons in 1979. This was the first decline in New York's air cargo imports since the recession year of 1970. Inbound air cargo tonnages were adversely affected by the orderly marketing agreements between the United States and a number of Far Eastern nations, which limited clothing and textile imports from the Far East, and by a softening of demand for machinery and capital goods.

DEPARTMENT OF TRANSPORTATION

The Department of Transportation is responsible for maintaining a comprehensive master plan for transportation development and for developing and promoting programs to faster efficient and economical public transportation services in the State. This includes preservation and improvement of commuter railroad and bus operations and coordination between the two. The Department supervises the planning, construction and maintenance of the State highway system and is responsible for developing a system of airports in New Jersey.

The Port of New York continued to dominate U.S. oceanborne general cargo trade in 1979 under the value-per-ton criterion. The Port's value per ton was $2,164, up 5.4% from 1978. This was more than 2.4 times the U.S. average of $896 per ton and 30% more than that of Baltimore, the second ranking port in value per ton.

SUBSIDIZED BUS OPERATORS - TRIP DEFICITS
FISCAL 1979

Twenty-two bus companies contracted for financial assistance for Fiscal year 1979. Of these, twenty-one received subsidy payments to offset their operating loss. Drogin Bus was not paid any subsidy due to the receipt of overpayment in FY 78.

A good service indicator for the subsidized carriers is the ratio of subsidy per passenger. These factors were derived from bus quarterly reports which were submitted by the operators during fiscal 1979.

SUBSIDIZED BUS OPERATOR REVENUES AND COSTS PER MILE
FISCAL 1979

A portion of operating revenues and costs are a direct function of mileage. Comparisons of the mileage ratios between subsidized companies can indicate which operating policies are the most efficient, thereby suggesting some modifications.

This table is compiled from numbers reported on the quarterly financial reports to the State.

NUMBER OF BUS ROUTES BY ASSISTED CARRIERS AND NUMBER OF INTERSTATE BUS ROUTES FY 1980

The function of bus service varies widely across the state. In the metropolitan areas surrounding New York and Philadelphia interstate service is an important element as many New Jersey residents are oriented to these major attraction centers. However, in the smaller urban areas such as Trenton, Atlantic City and Millville-Vineland-Bridgeton, local trips are the key function.

DEPARTMENT OF TREASURY

The Department of the Treasury's chief function is the operation of the state within its fiscal appropriation.

Its responsibilities include preparation of the Governor's budget message, tax administration, management of monies collected by the state agencies, supervision of purchasing, payment of payroll, pensions and services and material received by the state, and supervision of a state-centralized accounting system.

The Department invests state funds, administers pension and benefit programs, supervises building construction, repair and maintenance, insurance coverage and real property leases. It is also responsible for the administration of printing and microfilming, data processing and telecommunications, and operation of the lottery.

NEW JERSEY: WEATHER SUMMARY, 1979

January 1979

This month was wet and stormy, with frequent intervals of cold weather. Temperatures averaged near normal statewide with extremes of 64 at Woodstown and Long Branch and -3 at High Point Park. Precipitation was well above normal throughout the state, averaging 10.51 inches North and 8.27 inches South. Snowfalls were minor, with most of the state not experiencing continuous snow cover.

February 1979

February was a bitterly cold and snowy month, with the winter's heaviest snowfall on the 19th. Temperatures averaged 10 degrees below normal throughout the state, with a high of 65 at Moorestown and a low of -18 at Sussex. Many portions of the state experienced two weeks during which temperatures remained below freezing. Precipitation was above normal with 4.46 inches North and 5.87 inches South. Snowfall was heavy, generally averaging between 20 and 25 inches. The ground was snow-covered for much of the month.

March 1979

After a rainy start, March became a warm, dry month. Temperatures averaged 2 to 4 degrees above normal throughout the state, ranging from a high of 85 at Pomona to a low of 10 at Long Valley and Newton. Rainfall averaged near normal, with 3.55 inches North and 3.70 inches South. About 3 inches of that total fell in a heavy rainstorm on the 6th. No measurable snow fell within the state.

April 1979

April featured near normal temperatures and rainfall. Temperature extremes were 82 at Hammonton and 22 at Canoe Brook and Long Valley. Rainfall averaged 4.09 inches North and 3.54 inches South. Some of the higher elevations of the northern counties reported light snow on the 9th and 10th.

May 1979

This month began mild and dry, but cooler, wetter weather followed a heat wave around the 10th. Temperatures averaged near normal, with extremes of 93 at Little Falls and Newark and 30 at Newton. Rainfall averaged 6.50 inches North and 5.33 inches South, with nearly 4 inches occurring in 24 hours at Newark on the 23rd.

June 1979

After a mild start, June became quite cool, with statewide temperatures averaging 3 to 4 degrees below normal. Extremes were 90 at Cranford and Newark and 36 at Long Valley. Rainfall was near normal overall, averaging 3.25 inches North and 4.23 inches South.

July 1979

July began as late June had been -- with a continuation of below normal temperatures. Warmer and more humid weather developed after the middle of the month. Temperatures for the month averaged 1 to 2 degrees below normal, ranging from a high of 96 at Plainfield to a low of 40 at Long Valley and Newton. Rainfall was highly variable during July, averaging 3.37 inches North and 4.41 inches South. Some locations received as much as 8 inches of rain during July while others received as little as 1 inch.

August 1979

This month featured a pronounced cool spell during the middle of the month with warm weather at both the beginning and the end. Temperatures averaged near normal with extremes of 96 at Newark and 39 at several northern locations. Rainfall was again quite variable, averaging 4.86 inches North and 6.17 inches South. Cape May received 3.81 inches of rain in a 24-hour period ending on the 11th.

September 1979

September was a wet month with near normal temperatures. Extremes were 90 at a number of locations and 31 at Charlotteburg and Newton. Tropical storm David made headlines during September, lashing the state with 54 mile-per-hour winds and heavy rains. Many locations received over 3 inches of rain in less than 24 hours from David, with Ringwood reporting the statewide high of 5.77 inches. The overall monthly rainfall average was 7.54 inches North and 5.46 inches South. Many places received a light frost on the 20th.

Surplus accounts for the years 1970 and thereafter have been adjusted to reflect the current method of reporting surplus accounts. Under this method, all surplus accounts are included in the surplus total. This includes surplus, undivided profits reserve for contingencies and all other surplus reserves. In prior years the surplus account did not include these accounts.

The mortgage transaction statistics presented on the following tables do not correspond to the savings and loan association data contained in Part II of this report. The savings and loan association reports classify mortgages by the location of the lender; the home mortgage disclosure reports are aggregated by the location of the property being mortgaged.
